# A Message From Waterdrop

*Hello everyone!*

*I wanted to send you a message to tell you about one of my many travels. Just the other day I was up in a cloud high above a neighborhood when I suddenly got so heavy that I fell all the way down to Earth as rain and landed onto the leaf of a tree! From there, I dripped down to the ground and sank into the earth below. Trees and plants love me because I help provide the water they need to grow and thrive!*

*Water is very important. Think about all the different ways that you use water. To water your plants, to drink, or brush your teeth. What else?*

*Share one way you use water:*

*It is important to save water too! One idea is to turn off the water when you are brushing your teeth. What else?*

*Share one way you can save water:*

*Thank you for all you do to help our water!*

***Waterdrop***

*Draw a picture of waterdrop:*

**We want to share your Waterdrop!**

*Post to your social media and tag us at [treepeople\\_org](https://www.treepeople.org) #greenquarantine*

*This activity is made possible through the generosity of Godeleine De Rosamel & Ira Ziering*
