

# Rainwater Harvesting System

In photo: Caroline Bamberger, my partner in the Rain Tank Project, is excited about the tank's arrival after countless tedious hours of work and planning. The tank above is a 2,875 gallon capacity Bushman tank.

See other resource for description and instructions

## Field Trip Destinations:

- Water tank at Pali High (the project I designed) Contact me at [renatarobins@gmail.com](mailto:renatarobins@gmail.com) to plan a visit.
- TreePeople's eco-friendly headquarters located at the top of Mulholland in Beverly Hills. We have an entire underground cistern there.
- **Also see suggestions for field trips for Water Quality Testing (page 43)**

**Resources for Students, by Students**
